

Printing Guide for SAFe City

One set of SAFe City is comprised of:

- 4 Copies of Epics (Epic Layout Print Master.pdf)
- 4 Copies of Features (Feature Layout Print Master.pdf)
- 1 Copy of each of the story files:
 - Story Layout Print Master for Richey Rich Estate.pdf
 - Story Layout Print Master for White Downs Estate.pdf
 - Story Layout Print Master for Blueville Estate.pdf
 - Story Layout Print Master for Scaled Accommodation.pdf
 - Story Layout Print Master for Extreme Technology Park.pdf
 - Story Layout Print Master for Drews Downtown Shopping Strip.pdf
 - Story Layout Print Master for O'Neill Monster Mall.pdf
 - Story Layout Print Master for Lean Leisure and Health.pdf
 - Story Layout Print Master for Orphan Features.pdf

Printing Notes:

- Epics and Stories should all be printed in color and are single-sided.
- The Features are double-sided and should be printed in color on the front and B&W on the reverse. The reverse sides are indicated in the PDF fairly clearly (gray-scale with a big label on them). The intention is that the user of the simulation can just flip the card over and read the back – it all lined up when I did a duplex print on my printer.

Gotchas:

- There are obscene numbers of stories (550+ in total), each of which are numbered and most cross-referenced. I have for the most part assembled them to be 4 to a page to save wasted print pages, which causes some weird looking sequences.

Originals were prepared in powerpoint, pdf's produced using print to pdf. I've included the originals in case they're useful to you for anything.
